

An economy is the wealth and resources of a country or region, especially in terms of the production and consumption of goods and services. The economy is a critical factor in every nation and it is still continuing to decrease. Without a strong economic base, the economy will fall. Many people are suffering because they are either unemployed, or living in poverty. There are also many people who are being supported by the government, but they are not doing anything. Even though they are fully capable of working for themselves, they choose not to, and instead let the government support them. Another reason our economy is poor is because we are in a huge debt. One reason for this is because we are not being reimbursed for the help we give to our allies. This nation is also too dependent on China's economy for trade and when they fall, we will struggle as well. We also want to develop a fair tax plan as well.

There are many people who are being supported by the government but they don't work. Even though they are fully capable of working, they choose not to work. The A.I.M Campaign will make sure these people will work, or else they will not be supported by the government. In order to be supported by the government, people will have to work, and prove to the government that they can support for themselves.

Debt is also a main issue in America's economy. One reason for this is because we are not being reimbursed for the help we give our allies. For example, when one of our allies are in trouble, we will give them money, troops or whatever they need. Afterwards, we are not being compensated for the resources lost. We lose money from helping them, yet we are not being reimbursed from the money we lost. Therefore, Kimble will make a law saying that in order to be supported in a time of crisis, the nation in trouble has to sign a document saying they will reimburse America after the crisis.

Another example is student loan debt. Many students in college will receive loans in order to play for college, however, many students ask for too many loans and end up drowned in debt. Therefore they cannot pay off their debt, and add more debt to themselves. This will be fixed by not allowing the students to ask for more loans until they pay off the first loan.

America is also too dependent on China to create our products, therefore, we need to become more economically independent. Whenever China's economy goes through a tough time, we suffer as well because we depend too much on China. We need to become independent, and begin to depend on our economy.

Finally, Kimble would also like to develop a fair tax plan as well. The fair tax plan would abolish income tax, and instead create a higher sales tax. States like Texas and Florida already use this method. Therefore Kimble would only start in other big states such as California and Washington.

In conclusion, Kimble, representing the A.I.M Campaign, will put stricter enforcement on people having to work, making sure we will regulate student loans, and making sure we get compensated from the allies we give resources to, becoming economically independent, and creating a fair tax.
